CWAP-404

Certified Wireless Analysis Professional (CWAP) Certification

Question: 110

When configuring a long term, forensic packet capture and saving all packets to disk which of the following is not a consideration?

- A. Total capture storage space
- B. Individual trace file size
- C. Real-time packet decodes
- D. Analyzer location

Answer: B

Question: 111

You are performing a multiple adapter channel aggregation capture to troubleshoot a VoIP roaming problem and would like to measure the roaming time from the last VoIP packet sent on the old AP's channel to the first VoIP packet sent on the new AP's channel.

Which timing column in the packet view would measure this for you?

- A. Delta
- B. Absolute
- C. Roaming
- D. Relative

Answer: C

Question: 112

Protocol analyzers may present field values in either binary, decimal or hexadecimal.

What precedes a

hexadecimal value to indicate it is hexadecimal?

- A. 0x
- B. %
- C. HEX
- D. 16x

Answer: A

Question: 113

Which one of these is the most important in the WLAN troubleshooting methodology among those listed?

- A. Interview the network manager about the issues being experienced
- B. Talk to the end users about their experiences
- C. Observe the problem
- D. Obtain detailed knowledge of the wireless vendors debug and logging options

Answer: C

Question: 114

The network administrator at ABC Engineering has taken a large packet capture from one of their APs running in monitor mode. She has very little knowledge of 802.11 protocols but would like to use the capture file to evaluate the overall health and performance of their wireless network. When she asks your advice, which tool do you recommend she opens the packet capture file with?

- A. Capture visualization tool
- B. Protocol analyzer
- C. Spectrum analyzer
- D. WLAN scanner

Answer: B

Question: 115

802.11k Neighbor Requests and Neighbor Reports are sent in what type of Management Frames?

- A. RRM
- B. Action
- C. Beacon
- D. Reassociation Request and Reassociation Response

Answer: C

Question: 116

Which one of the following is required for Wi-Fi integration in laptop-based Spectrum Analyzer software?

- A. A supported WLAN adaptor with a customized driver
- B. Any 802.11 wireless adaptor
- C. A dual radio spectrum analyzer card
- D. SNMP read credentials to the WLAN controller or APs

Answer: C

Question: 117

You are the WLAN administrator for a large retailer based at the HQ in New York. The London-based office has been complaining about WLAN disconnections around lunch time each day. You suspect this might be interference from

the staff microwave, how might you test your theory from the New York office?

- A. Access the microwave remotely and run a diagnostic check
- B. Ask a local member of staff to take some pictures of the microwave, including some close-ups of the door seal so that you can access it
- C. Place one of the London APs into spectrum analyzer mode and monitor the situation over lunch time
- D. Ask a local member of staff to change the frequency of the microwave and see if the disconnections stop

Answer: A

Question: 118

ABC International has installed a new smart ZigBee controlled lighting system.

However, the network team is concerned that this new system will interface with the existing WLAN and has asked you to investigate the impact of the two systems operating simultaneously in the 2.4 GHz band. When performing Spectrum Analysis, which question could you answer by looking at the FFT plot?

- A. Do the ZigBee channels used by the lightning system overlap with the WLAN channels?
- B. Is the ZigBee system using more the 50% of the available airtime?
- C. Is the ZigBee system causing an increase in WLAN retries?
- D. Is the WLAN corrupting ZigBee system messages?

Answer: C

Question: 119

In a Spectrum Analyzer the Swept Spectrogram plot displays what information?

- A. The RF time domain
- B. RF power present at a particular frequency over the course of time
- C. Wi-Fi Device information
- D. Duty cycle in the frequency domain

Answer: D

Question: 120

You have installed a new 802.11ac WLAN configured with 80 MHz channels. Users in one area are complaining about poor performance. This area is currently served by a single AP. You take a spectrum analysis capture in the poor performing area. While examining the waterfall plot you notice the airtime utilization is higher on the first 20 MHz of the 80 MHz channel when compared to the rest of the channel.

What do you conclude?

- A. The AP is misconfigured and needs to be reconfigured to 80MHz operation
- B. RRM is enabled and has dynamically picked a 20 MHz channel
- C. The first 20 MHz is the AP's primary channel and higher airtime utilization on the primary channel is normal when an AP is configured for 80 MHz operation
- D. Non Wi-Fi interference is preventing the APs 80 MHz operation

Answer: C

Question: 120

Which common feature of a Spectrum Analyzer would be the best to help you locate a non-802.11 interference source?

- A. Max hold
- B. Location filter
- C. Waterfall plot
- D. Device finder

Answer: D

Question: 121

A manufacturing facility has installed a new automation system which incorporates an 802.11 wireless network. The automation system is controlled from tablet computers connected via the WLAN.

However, the automation system has not gone live due to problem with the tablets connecting to the WLAN. The WLAN vendor has been onsite to perform a survey and confirmed good primary and secondary coverage across the facility. As a CWAP you are called in to perform Spectrum Analysis to identify any interference sources. From the spectrum analysis, you did not identify any interference sources but were able to correctly identify the issue.

Which of the following issues did you identify from the spectrum analysis?

- A. The tablets are entering power save mode and failing to wake up to receive the access points transmissions
- B. A high noise floor has resulted in a SNR of less than 20%
- C. The tablets are connecting to the wrong SSID
- D. There is a power mismatch between the APs and the clients

Answer: A

Question: 122

Finish the statement. It is possible to distinguish between _____ and _____ 20 MHz transmissions when looking at an FFT plot.

- A. HR/DSSS and ERP
- B. ERP and VHT
- C. HT and VHT
- D. OFDM and HT

Answer: C

Question: 123

What is the function of the PMD sub-layer?

- A. Converts 1s and 0s given to it by the PLCP sub-layer into the appropriate RF signals
- B. Provides framing
- C. Adds a PHY preamble and header to a PSDU
- D. Performs A-MPDU

Answer: A

Question: 124

What is the function of the PHY Preamble?

- A. To set the modulation method for the MPDU
- B. Allows the receiver to detect and synchronize with the signal
- C. To terminate a conversation between transmitter and receiver
- D. Carries the NDP used in Transmit Beamforming and MU-MIMO

Answer: B

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
