, How much interest is earned in one year on \$4,800at 2 3.4%?

A. \$33.00 B. \$50.00 C. \$66.00 D. \$103.00 E. \$132.00 Answer: E

Explanation:

\$4,800 is four times as much as \$1,200 and, therefore, earns four times as much interest. $4 \times $33.00 = 132.00 .

Question: 81

- , How many students are in grade 5?
- A. 12
- B. 63
- C. 87
- D. 90
- E. 150

Answer: D

Explanation: The school has 750 students and 12% of them are in grade 5. 12% of $750 = .12 \times 750 = 90$.

Question: 82

, The total number of students in grades 1 and 3 is the same as the total number of students in which of the following grades?

A. 2 and 7 B. 4, 7, and 8 C. 4, 5, and 7 D. 2 and 6 E. 5 and 6

Answer: D

Explanation:

Sixteen percent of the students are in grade 1, and 12% of the students are in grade 3. Therefore, 16% + 12% = 28% of the students are in grades 1 and 3. For choice A you need to add the percentages for grades 2 and 7: 14% + 12% = 26%. For choice B you need to add the percentages for grades 4, 7, and 8: 10% + 12% + 10% = 32%. For choice C you need to add the percentages for grades 4, 5 and 7: 10% + 12% + 12% = 34%. For choice D you need to add the percentages for grades 2 and 6: 14% + 14% = 28%. This is the correct answer.

Question: 83

, How many more students are in grade 2 than ingrade 8?

Answer: C

Explanation:

The school has 750 students and 14% of them are in grade 2. 14% of $750 = .14 \times 750 = 105$. Ten percent of the students are in grade 8. 10% of $750 = .10 \times 750 = 75$. To determine how many more students are in grade 2, subtract: 105 - 75 = 30.

Question: 84

, How many students are in grades 5 and 6combined?

A. 195B. 260C. 305D. 350

E. 375

Answer: A

Explanation:

Twelve percent of students are in grade 5 and 14% of students are in grade 6. 12% + 14% = 26%. Because 750 students are in the school, we need to calculate 26% of 750 = $.26 \times 750 = 195$.

, If 30 students in grade 1 transfer to a differentschool and no other students enter or leave any of the other grades, what is the new percent of students in grade 3?

A. 9% B. 9.5% C. 10% D. 12% E. 12.5%

Answer: E

Explanation:

The school has 750 students, and 12% of them are in grade 3. 12% of $750 = .12 \times 750 = 90$. After 30 students leave the school, 750 - 30 = 720 students remain. We need to determine what percent 90 is of 720: $90 \div 720 = .125 = 12.5\%$.

SAMPLE QUESTIONS

These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

<u>Actual Exam Questions</u>: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

<u>Exam Dumps</u>: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

<u>Practice Tests</u>: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

<u>Guaranteed Success</u>: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

<u>Updated Content:</u> Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

<u>Technical Support</u>: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
